WELCOME

*We are a product design studio that 3D
print homewares out of recycled materials*

ABOUT US

We're Courtney & Matthew, the duo behind Utilize Studios.

We are a couple of Kiwis who share a passion for creativity, design and nature. Our mission at Utilize is to decrease the amount of valuable materials going to landfill by creating homewares that tell a story.

Our name, 'Utilize' captures our ambition to make practical and effective use of every material, tool, technology and software that is used for each one of our products.

Join our community to give waste materials a new life and have a positive impact on the environment.

WHATS IMPORTANT?

LOCAL PRODUCTION

We **Make To Order** so there is less wasted stock and we can minimize production processes.

We produce our products **In House** so we consume less resources and have faster turn around times.

We can offer **Customized & Exclusive Products** that could be printed (theoretically) anywhere using low-cost machines.

SUSTAINABILITY

We only print with **Recycled Materials**, keeping them out of landfill or pollution.

Our **Recycled Biodrived Materials** are made from cornstarch that can be composted back into the earth.

We use **Additive Manufacturing** which only uses the required amount of material, with minimal wastage.

QUALITY DESIGN

We create **Timeless, Purpose Driven** designs that form a statement and are unique to New Zealand.

We use **Innovative Technologies & Software** to push for better products and continuously advance the product.

ARCH BOOKEND

MATERIAL

3D printed woven, matte finish bookends. Made with 98%-100% recycled PLA plastic from used food packaging or recycled PET plastic from used medical trays.

DETAILS

Dimensions: 104mm wide x 102mm deep x 110mm high

Weight: 100 grams each

PRODUCT INFO

The Arch Bookend (set of two) celebrates the blend of New Zealand culture through its woven exterior and highlight the layer-by-layer process of 3D printing.

Use to hold up books, hide cords, store stationery, bookmarks or dried flowers.

ORVEN BASKET

MATERIAL

3D printed woven style, matte finish basket. Made with 98%-100% recycled PLA plastic from used food packaging.

DETAILS

Dimensions: 213mm wide x 207mm deep x 168mm high

Weight: 250-270 grams

PRODUCT INFO

The Orven Basket celebrates New Zealand's identity through its woven texture and highlights the layer-by-layer process of 3D printing.

Use in your home to store toys, hand towels, paper products or even to display your favourite indoor plant.

PUMICE PLANTER

MATERIAL

3D printed planter with a pumice-like texture and matte finish. Made with 98%-100% recycled PLA plastic from used food packaging.

DETAILS

Dimensions: 120mm wide x 120mm deep x 125mm high

Weight: 185 grams

PRODUCT INFO

The Pumice Planter takes inspiration from nature with its rough pumice-like texture that is emphasized through the layer-by-layer process of 3D printing.

Use in your office, kitchen, bedroom, bathroom or living room to display your favourite little indoor plant.

DISCLAIMERS

As the designs are 3D printed, your finished product may have slight variations, with its own unique characteristics.

We have made every effort to display as accurately as possible the colours and images of our products that appear with the catalogue/online. We cannot guarantee that your computer monitor's display or printed catalogue of any colour will be accurate.

All measurements and weights are approximate.

All descriptions of products or product pricing are subject to change at any time without notice, at the sole discretion of us. We reserve the right to discontinue any product at any time.
